RV Timeline and Usage explanation letter:

To Whom it May Concern,

We are asking for permission to utilize our Lancaster Cabin RV in it's current location on the gravel driveway of 200 Tomlinson Mill Road.

This RV is temporary and is only located at 200 Tomlinson in the interim,as we will be transporting it up to a property in upstate NY in 2026.

While it is on the 200 Tomlinson property, we are asking for permission to utilize it as additional living space for our family of six as we hope to undergo construction for an addition on our current home.

We currently only have one bathroom and two actual bedrooms, and we are squeezing my sister, her wife and their daughter into the upstairs playroom.

My daughter [REDACTED] We are a close family and we have hoped and dreamed of raising our daughters together on this property since we purchased it in 2022. Although we had hoped to build an ADU on our property, we ran into many obstacles while pursuing that route, including the lack of public sewer, and the fact that our property is just shy of the 4 acres needed to subdivide. Despite the setbacks, we are dedicated to our goal of being together and raising our girls in Evesham on this incredible historical property. We are working towards that goal by asking the township to allow us to expand our current home in order to provide a comfortable living situation for our family of six.

We have worked hard to prepare for this next step, and we have our lawyer, planner, architect and historical home contractor all ready to go once we get approval from the township.

Our contractor has assured us that the addition can be started very quickly as long as we are able to get the necessary approvals from the township.

Thank you for your time,
Rachel Willey
